INJECTION EQUIPMENT

REMARKS LEGEND -

Engine (e) numbers:

35D = 3.9 liter, manual transmission, distributor ignition

36D = 3.9 liter, automatic transmission, distributor ignition

50D = 4.0 liter, electronic ignition

Vehicle i.d. (v) numbers:

RA = 1994 model year

TECH TIP: Discovery I - PCV Tune Up

Pop the hood and look for oil leaks around your valve covers periodically. If you see any seepage (discern any discharge?), you probably have excessive carbon build-up in your pcv system that's causing undue pressure on your seals. It's a simple job to replace them and should be done sooner, rather than later.

TECH TIP: Discovery I 4.0 Know Your Emissions System

If your Discovery I was built in October 1996 or later, it has a specific 'Evaporative Emissions Family' that will help you determine key fuel system replacement parts like oxygen sensors, fuel pump, fuel filler cap, fuel tank and filler pipe assembly, charcoal canister and more. To identify your 'Evap Family,' check your vehicle information label under the hood on the vertical face of the hood latch panel.

VLR1124AYPFE = Advanced Evaporative Loss System
VLR1060AYPBC = Standard Evaporative Loss System
 Know your 'Evap Family' ID when calling to order fuel system parts!
