MONEY-SAVING KITS NOTED IN RED TYPE

Brakes & Brake Pads

Brake parts are a specialty at Atlantic British. We offer FOUR different pad choices—Land Rover Genuine pads, Standard “E”-rated pads (meeting or exceeding OEM specs), Ferodo asbestos-free, anti-squeal pads and dustless, High-Performance Kevlar pads. Plus, of course, rotors and convenient, cost-effective Brake Kits—all the seals, washers, pins and clips you need, all in convenient kit form and all specified to your vehicle. No re-ordering forgotten parts. And no “brake mistakes” by ordering the wrong parts! See our full line of brake pads, rotors and complete kits to the right!

TECH TIP: Brake Fluid

1
BRAKE FLUID
#2501

We recommend changing your brake fluid at least once every two years. Water is absorbed by the brake fluid and can find its way into every part of your braking system, from the calipers to the master cylinder, leaving rust, leaks and corrosion in its wake. That's why we also recommend changing your brake fluid with Castrol's Low Moisture Absorption formula. Castrol LMA is specifically designed for the high rubber content of Rover seals and won't dissolve them the way synthetics can, plus it won't absorb the water that can lead to corrosion down the road.

- Castrol LMA Brake Fluid - 12 oz. (2501)
- Castrol LMA Brake Fluid - Quart (2521)
